

Elisabeth Brady, a native Miamian, earned a Bachelor's degree in chemistry and mathematics which was put to use doing basic research with her husband at the University of Miami's Medical School Department of Biochemistry.

Subsequently, she became a Certified Public Accountant and earned a Master of Science in Taxation from FIU.

The first accounting experience was comptroller, initially for a computer networking company and then a computer export company. Eventually she migrated to public accounting, concentrating in the area of taxation for the past fifteen years. At first, she worked for other accounting firms and then opened her own firm eleven years ago. Clients included small businesses, individuals, not-for-profits, trusts, estates and guardianships. Problem resolution at all government levels is one of her area of expertise.
